Description

Clay jar from Ancient Peru, Moche style, probably Early Intermediate, ca. phase IV. The jar has a spherical belly, an oblong neck and a handle that is fixed on top of the belly and in the middle of the neck. A light yellow clay serves as grounding, on which red cranes and a stripe are painted.

The Museum of the City of Ulm bought the jar together with four other Peruvian vessels from art dealer Dr. Franz Xaver Weizinger

Basic data

Material/Technique: Clay
Measurements: H 23 cm, DIA ca. 14 cm
